# Logic Model (FY2023 version)

**AXCELEAD**

**Legend**  ▢ Drug Discovery Solutions   ▢ CDMO

| Social Background | Activities (Services) | Output from Our Activities | Mid-term Outcome | Long-term Outcome | Impact | The Society We Try to Realize |
|---|---|---|---|---|---|---|

Diversifying unmet medical needs

Blocking health and medical care promotion for the entire world population due to global social issues such as the COVID-19 pandemic and climate change

Dealing with medical access due to uneven distribution of medical environments and medical technology between developed and developing countries

Dealing with pandemic learning from the COVID-19 pandemic and "new normal"

Providing a drug discovery platform that supports the promotion of drug discovery, and research and development of diverse customers

Supporting customer drug discovery through mRNA research and development and manufacturing technology, and providing CMC development and pharmaceutical manufacturing support services

Supporting customers investing in diverse therapeutics areas

Creating and increasing drug discovery seeds based on Pharma standards

Accelerating the finding of drug discovery seeds of highly difficult targets or high success rate, and promoting to the clinical stage

Providing a global joint technology development platform

Constructing and operating a factory that can quickly manufacture products using various mRNA technologies with the quality that meets international standards

Creating high quality mRNA drug discovery seeds, and promoting to the clinical stage, and integrating contract research and development to manufacturing

Supplying high quality and speedy research and development

Improving drug discovery and manufacturing capabilities throughout the industry

Providing a prompt and stable supply of high-quality mRNA drug substances and formulations for clinical and commercial purposes

Increasing the number of new drugs created

Decreasing the number of unmet and undiagnosed diseases

Accelerating the development of drug discoveries that can find necessary and sufficient treatments and improve quality of life

Having fewer patients with limited treatment options or physical access

**Meeting unmet medical needs and extending the healthy life expectancy of people around the world**
